

## ...mobile vehicle buying solution

### Benefits Realised

- Lower overheads through reduced manual processes
- Reduced stock holding times through automatic upload to your auction or DMS system
- Pre-marketing of vehicles before arrival onsite.
- Increased efficiency providing one point of data entry to assess, value, and upload newly acquired vehicle stock

AutoBuy is a user friendly, mobile PDA application that provides motor dealers with a single point of data entry for vehicles purchased for resale.

Seamless integration with the Dealer / Auction Management System via wireless allows the vehicle to be processed within seconds of entry by the purchaser.

AutoBuy has been specifically designed for motor dealers and buyers to capture stock details at point of purchase.

## Vehicle Description and Valuation

- One point of data entry to record all vehicle, owner and customer details
- Integrated with CAP, Glass's, and Redbook vehicle description and valuation databases
- Valuation adjustments based on mileage, damage, and vehicle features
- Integrated with encumbrance services such as Experian, HPI, and Revs

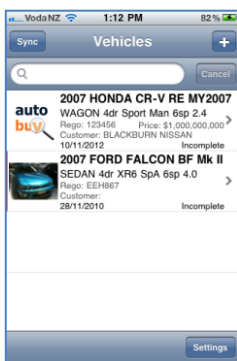

## Photo and damage capture

- Capture photos and load against the vehicle record
- Record specific vehicle damage against relevant body diagram

## Integration

- Integrate with your DMS or auction system for automatic upload of vehicle details
- Automatic email alerts to transport providers, repairers and sales teams
